

GET TICKETS

The Engineering & Geology Symposiums are FREE events for Underground and Open Pit Engineers and Geologists to showcase an exciting project or share something new or interesting at their mine site.

These events give everyone the opportunity to listen, learn and share challenges from first-hand experiences. Our goal is to bring mining industry professionals together to improve both our collective knowledge and the future of the resource industry as a whole.

This year, the Engineering Event will be held in Kalgoorlie. There will be time after the event for food, drinks and networking.

Engineering Event
